

Fixing climate change, one start-up at a time

The leading green business ideas competition

Our impact is growing with each year

Ever since our start in 2014 we are the largest green business ideas competition in the world. Every year more countries and continents join, more ideas are entered and more cleantech start-ups successfully find their way to global impact on climate change. In 2020 we transitioned the competition to a fully digital version, with the lowest carbon footprint to date. We proudly share our numbers with you.
